WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

- The door is the second tank head with the second flange ring
- Surplus heads: 813 OD, wall 5.9 or more, 40 mm skirt; check before buying that the skirt fits the ring and the pipe
- Set the ring over the head's 40 mm skirt, face flush with the skirt's open end; check the face is flat within 1 mm
- Fillet weld ring to skirt both sides in short balanced runs
- Weld the two door lugs to the ring's edge (sheet 109)
- Grind the gasket face smooth where the welds meet it
- The door weighs about 72 kg; lift it with a hoist or two people
- Check: door face flat; no weld proud of the face

AltiRig door: head welded into a flange ring
