WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Stub: cut 140 long from 6 in XS pipe, both ends square
Ring: 260 OD x 154 ID from 20 mm plate; drill and tap 8 x M10
on a 225 circle, 25 deep
Weld the ring on one stub end, face square to the stub
Set the stub into the shell's feed-through hole (740 from the
door end) so the ring face is 500 from the axis; inner end 360
Fillet weld the stub to the shell outside and inside, 8 mm leg
Check: ring face flat and square; the plate's holes line up

ALTIRIG

github.com/BoujeeEnjinia1701/altirig

AltIRig feed-through nozzle and flange
