WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut a 260 dia disc; drill 8 x 11 dia on a 225 circle
Drill five 20 dia holes: one at the centre, four on a 70 x 60 rectangle around it
Fit M20 IP68 cable glands, O-ring on the inside face
Motor phases: three 6 mm2 cores through one gland; signals and sensors through the others; blank any spare gland
Pot each cable in epoxy for 50 mm inside the gland so air cannot leak along the strands
Check: glands tight; plate flat; potting fully cured
