WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Leaves: two 120 x 110 cut from 0.5 hardened spring steel shim;

cut with snips or a guillotine, no bends or kinks

Clamps: four blocks 30 x 140 x 20; slit each along its middle

so the leaf is gripped between two halves; two M5 screws each

Lower clamps screw to the base plate, upper to the carriage,

200 apart, so the leaves stand parallel and 80 free between

Assemble with a 80 spacer block between the clamps to set height

Check: carriage moves freely fore and aft, springs back to zero
