WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Arm: 10 thick; 30 dia hub bored 15 and slit, clamped with one M4 screw; the bar reaches 60 from the axis to the cell
Bracket: 40 x 21 x 33 block, two M5 to the housing side
Torque cell lies along the axis on the bracket, fixed end down on the bracket, free end under the arm's tip
A 3 mm steel ball in a dimple carries the arm onto the cell
Check: arm rests on the cell with the shaft free to turn
